Publisher Introduction Raising or  
bringing up children is a very tough job for  
the parents. Every parent would do  
anything to keep their children away from  
all harms and injuries. You might try to be  
like a protective shield for your child all  
the time, but sometimes it becomes  
impossible for you to guard your kids  
against the odds. Your little champions  
cannot afford to stay in one place. Children  
are naturally intrigued by every object they  
come across. Its their intrinsic ability to  
explore everything. The curiosity that  
dwells inside them makes them kind of  
restless (weve all been kids so its  
understandable). No matter how many  
times you forbid your kids from doing  
dangerous activities or touching harmful  
things, they simply wont stop doing it. You  
cant keep an eye on your kids all day, can  
you? Once theyre out of your sight, they  
might up end up in some danger. What  
would you do if your baby (God forbid) or  
someone elses baby starts choking after  
having ingested a coin? What would you  
do to save that baby? Do you think youre  
prepared to cope with that emergency? If  
not, then you need not worry. This book is

all you need to keep your baby safe in any emergency. This book is a complete guide for you that can help you manage any emergency situation that you and your baby might face. Calling for emergency help is certainly the first thing to do, but you cant wait for help and stand there and do nothing. After reading this book, youll be equipped with different techniques and maneuvers that are simple, yet effective, and can prove to be the difference between your babys safety and danger. We dont mean to startle you, but being prepared is always better than being sorry. So take a deep breath here and start with us on your journey to become an even better mother/father to your children.
