

## Moving and Grooving (Chester Comix)

Chester the Crabs Moving and Grooving shows today's students how people got around in the past. It's a race across 400 years of transportation in North America - from Native American footpaths to sailboats on the Potomac River to trains across the Midwest. There's a full chapter on the Wright Brothers' pursuit of powered flight and a full chapter on how we got to the Interstate Highway system. It's all full-color fun for visual learners!
