

## The Tricolor on the Atlas: Or, Algeria and the French Conquest; From the German of Dr. Wagner and Other Sources (Classic Reprint)

Excerpt from The Tricolor on the Atlas: Or, Algeria and the French Conquest; From the German of Dr. Wagner and Other Sources Among the Tourists who have given us an account of the Regency of Algeria, the Bavarian naturalist, Dr. Moritz Wagner, has distinguished himself by the liveliness of his descriptions, the earnestness of his researches, and the frankness with which he has expressed his views. He remained for three years in the Regency, and published in 1841 an amusing and instructive account of his journey. A great portion of his Work having become antiquated, I have condensed his first volume, translated his second, added an account of later events, from the capture of Constantine to the surrender of Abd-el-Kader, and given a general view of the present state of the French possessions on the north coast of Africa I have made careful use of the most recent French works on Algeria, and principally of the official Blue Book, published by imperial authority in 1853, under the title Tableau de la Situation des Etablissements Francais dans l'Algerie, 1850-52.
