poetry Description This book of poetry provides us with a wide-ranging picture of mental health in the UK and the contribution that poetry can make to a better understanding of our mental condition and the reasons for it. The eighteen poems in this collection are written in remembrance of the late Roy Crew, who suffered from schizophrenia in Britain from the 1940s until the 1960s. They are written by his brother, Bob Crew, who is a published poet who visited Roy regularly and observed him carefully throughout his long illness. They tell the story of Roys illness and ultimate survival and they are the kind of poems that Roy could not have written for himself because his condition was too severe and he had no apparent talent for poetry. About the Author Bob Crew is a published author and poet whose others books - Sea Poems, Gurkhas at War and The Beheading & other True Stories - are currently in the bookstalls and on Amazon.
