

The Broken World of Online Dating

With over 4? years experience of online dating, I have experienced many ups & downs, but in particular my experiences and those of some of my friends have confirmed that there is a pattern of behaviour going on, which can leave many people distressed. With this in mind, I started writing about my experiences and the common pattern of behaviour that goes on. On discussing this with my friends and showing them some of my stories, they all urged me to publish a book - saying I owed it to people to share this knowledge and so, *The Broken World of Online Dating* was produced. My story includes many of my personal dating experiences and outlines the types of characters that are online. It also highlights some general things to watch out for whilst online and gives tips on how to recognise negative behaviour and how to deal with it. My story finishes up with a Survival Kit on how to emotionally survive the world of online dating. I am not claiming that online dating is all bad as it is not and can prove successful for many people. I just feel that if people are made aware of the negative elements of it and are able to avoid them, it may enhance their chances of success from it. After all, forewarned is forearmed. I genuinely wish that I had been able to read something like this, prior to entering into the world of online dating. Instead, I had to live it to be knowledgeable enough to share it with you and of that, I am delighted to be able to do. I sincerely hope if you download my story, you learn a lot from it, but also, you laugh out loud at the madness this world can throw you into. If you are doing online dating, considering it or simply interested in the subject, then reading my story is a must for you.
