

# A Relationship Restored: Trends in U.S.-China Educational Exchanges, 1978-1984

In what The Wall Street Journal calls the first comprehensive analysis of Sino-American educational exchanges, this volume provides information on the numbers and attributes of American and Chinese students and scholars who have moved between China and the United States since 1978. This book not only supplies quantitative data on their fields of study, length of stay, and financial resources, but also discusses such qualitative issues as the problems students and scholars have encountered in carrying out their work, the adequacy of their preparation, the reabsorption process that students and scholars from China face upon their return home, and the impact of the exchange process on fields of study in both countries.
