

Create a Basic To Do List iPhone App using Xcode and iOS8 Swift (GoodStartBooks Swift Programming)

Creating an iPhone App is something that many of us want to do but we just don't know where to start. With this eBook from Good Start Books you too can learn how to begin creating the Apps you want to make. Focused entirely on a simple To Do List iPhone App, you can begin to understand the uses of Xcode and iOS8 Swift and how they can be used to create your iPhone Apps. This book takes a no frills approach to using Xcode, focusing entirely on what to do rather than getting overly complicated and focused on technical language. Complete with images and basic, uncomplicated language this book is a step by step guide to building a To Do List iPhone App. In this eBook, you will learn:

- How to use Table Views.
- How to use Controller Views.
- How to populate the Table View using arrays.
- How to delete items from the Table View.
- How to add items to your to do list.
- How to navigate between screens.
- And very important: How to save your list, so when you close your App and open it again, your list will stay there.

In addition, in this book you will learn the basic concepts: Using Xcode. How to use the storyboard to paint your screen. How to associate your objects in the storyboard with the code. How to test your application in the simulator. How to start coding.
