

## Joining Hands: Jeannies Story As Told By Kathy Ellis

Jeannie had been told by her doctor that she needed to lose weight. A hundred pounds! This story details how she accomplished that feat ... and medical difficulties that followed. During 2003, the year after her weight loss, she had a tummy tuck and thigh lift to remove excess skin, emergency gall bladder surgery, was diagnosed with a brain tumor and had Gamma Knife surgery, had a hysterectomy to remove the largest fibroid tumor the local hospital had ever seen, suffered Grand Mal seizures, and had brain surgery. How her friends and family pulled together creating a synergy of love strong enough to get her through is a heart-warming story. This is a story of love, caregiving, and the remarkable recovery from a series of medical challenges.
