

Exodus: Visual Development of an Epic Adventure

In its first installment of their own Intellectual Property, Steambot Studios, a collective of six digital artists working in the world of visual Entertainment, takes us aboard an epic science fiction journey. In Exodus - created in parallel with a series of educational DVDs - the group demonstrates their creative production art techniques developed through many years of experience in the field (E.A., Activision, Unisoft, Epic, Digital Dimension, Canol Plus...). Follow the Steambot crew through an original but also realistic point of view on futuristic civilizations, space transportation and society.
