

Ferals Volume 3

Ferals presents a 21st Century werewolf drama - complete with violence, sex, and the most ferocious reimagining of the classic mythology ever created! Dale Chesnutt has lost all control. The feral wolf blood within him leads him towards the murder of the man that killed his love and unborn child. And that bloodlust has driven him rabid with purpose. But when the community of Ferals feels trapped by the encroaching military confinement of their population, the proud bloodline responds in kind. All the while the insane Doctor Cherrys experiments turn from understanding the condition to becoming a slave to it. The end has come - its the brink of war! David Lapham as redefined the werewolf mythology into one of the most mesmerizing stories in comics today. This volume takes the Feral and human races to the brink and kicks them both over snarling and screaming for mercy. Collects Ferals issues #13-18.
