

Field Guide to the Mammals of the Indian Subcontinent: Where to Watch Mammals in India, Nepal, Bhutan, Bangladesh, Sri Lanka, and Pakistan (Natural World)

This book is a field guide to the mammals of this unique subcontinent and includes the best places to watch them. It describes each of the 100 plus species that can be recognized in the field, including identification, habitat, range, behavior, diet, breeding, status, and similar species. The Field Guide also contains color illustrations of each mammal as well as tracks of the more prominent species, and mammal lists and maps for each national park.

Key Features*

The only current guide to mammals of the region* Contains color pictures and full text on the 106 larger species likely to be encountered* Includes drawings of tracks of key species to aid identification* Presents full details of 23 parks and reserves, with location maps, visiting details and species lists for each* An authoritative and beautifully illustrated field guide to the larger mammals of the Indian subcontinent.* Includes almost all the species that can be identified in the field easily.* Concise descriptions of each species, including identification, habitat, range, behaviour, diet, breeding, status, and similar species.* Describes and maps all the finest national parks and protected areas in the subcontinent, specially chosen for superior mammal watching.* Tracks of a selection of mammals to aid their identification in the field
