

Colleges and Universities Computer Science and Technology of the 21st century planning materials: FORTRAN 90 programming tutorial (2nd edition)

Pub Date :2003-2-1 Publisher: Beijing University of Posts and Telecommunications Press FORTRAN language is the worlds first high-level language that appears in the field of scientific computing has a very wide range of applications . From 1954 the first FORTRAN language version come out so far . FORTRAN language has made significant progress . FORTRAN language development make this ancient language full of new vitality. This book describes the basic FORTRAN 90 programming methods . and strive to cultivate the readers programming capabilities. Main contents are : FORTRAN program design . programming sequence structure . selection structure programming. programming loop structure . FORTRAN 90 data types. input and output formats . arrays . subroutines . structures . pointers. documents . FORTRAN graphical user interface design . Author characteristics for beginners . and str...
