

First to Fly: How Wilbur and Orville Wright Invented the Airplane

It started with a toy. As boys, Wilbur and Orville Wright loved making their helicopter fly. As adults, the brothers made their living taking things apart and putting them together again: printing presses, bicycles, planes... . Through trial and error, these two boys from Dayton, Ohio, built the plane that would change the world forever. With an inspiring text, original paintings, period photographs, and detailed diagrams, *First to Fly* recreates the story of the Wright Brothers, from their earliest challenges to their final triumph.
