

How I Make \$1,000 Per Month Running a Minecraft Server: Strategies for Running a Successful Server

Hi, Im Tim. Im not a professional writer, but I do own several successful Minecraft servers. In 2011, I was introduced to Minecraft by a friend and fell in love with it. Even a few years after release, the game still has countless surprises and gameplay paths to offer, I, like so many others, thought to myself I want to start my own server. But unlike many of the others, my idea was to turn the server into a way to make some extra cash. Was my plan to get rich? No. But I knew with my existing business experience, I would be able to turn it into something that I enjoy doing, while carrying itself at least and earning some extra money at best. My motives for making money with my server were 2 fold:

1. To justify my time spent on a game to myself and my family.
2. Because of good old fashioned capitalism. (Who wouldnt want to make money?)

Thankfully, my ideas seemed to work, and I have used the strategies I detail in this book to build a nice income with my hobby Minecraft. I broke even on my 2nd month, and continued to grow, almost every month since I started. Last month my network did \$1,955 in revenue, and I project next month to surpass \$2,000.
