

The Battle of Adwa, 1896: Exposition and Analysis of Ethiopia's Historic Victory Against European Imperialism

The 1896 Adwa victory over European imperialism is an important event in the collective memory of the Ethiopian people. It is the only secular episode in the history of Ethiopia that has been celebrated with unabated popular enthusiasm for more than a century. As a complex nexus of various historical processes involving wide-ranging but many unexplored meanings, the battle is carefully examined by the contributors in this volume. They illustrate how the battle transcends the specificity of time by continuously generating aspirations and meanings that have greatly influenced the rise and evolution of modern Ethiopia. As an historical event, it also awakened the hope for emancipation and the struggle against colonialism and racism among Africans in the colonies and across the diaspora. The texts assembled here analyze Adwa from various perspectives—diplomatic, historical, normative, cultural, political, and theoretical—and they consider critically its significance to understanding and resolving the problems faced by contemporary Ethiopia. Charting new avenues of the exploration of this momentous historical landmark, the volume opens up new dimensions for investigating the universal significance of this unforgettable victory. Contributors to this important analytic and historical work, including the editors, are Dejazmatch Zewde Gabre-Selassie, Negussay Ayele, Richard Pankhurst, Harold Marcus, Mesfin Araya, and Theodore Vestal.
