

## IBS Gut Instinct: The Definitive Solution For Improving Gut Health - Treating Irritable Bowel Syndrome And Achieving Gut Bliss

If I Can Show You How To Reduce Or Eliminate Your IBS Symptoms, Would You Be Interested In Learning More? Im about to reveal a method that can assist you in finally overcoming your IBS symptoms, and heres the best part: There are No Supplements To Take, There is No Change To Your Diet And There is No Use Of Medication Required! I know thats a bold statement, but I can confidently say that because Ive been personally using this approach with clients for over a decade. And trust me when I say IT WORKS. If my word is not proof enough for you, then youll find that this book contains medical references from over thirty years of study that agree with me. This Method Is 3X More Effective Than Standard Medical Treatment! Standard medical treatment for IBS (which changes what you eat and gives you medication) has not been able to satisfactorily improve or lessen IBS symptoms; in fact, its only effective for 25% of the population. To date there is no known single cause for IBS and medical science has no single effective treatment either. In IBS Gut Instinct, you will learn about a specific technique that will help you overcome your IBS symptoms. While almost all other books about IBS tell you what foods to eat and what foods not to eat, they dont tell you that FOODS ARE NOT THE SOURCE of the problem. This method is clinically proven, and yes, it has helped people just like you reduce or eliminate their IBS symptoms; and the fact is that studies show this method is effective 70% to 90% of the time. If you are one of these people, I promise you that you will get your life back. My name is Dr. Larry Siebert and my Doctoral degree is in Clinical Hypnotherapy. Ive been in private practice in the San Francisco Bay Area since 1996, and have traveled thousands of miles to attend trainings in the area of personal growth. Many of those trainings have been in the area of how the mind and

body communicate to promote emotional and physical healing. Its this communication that well be using. Why will we be using mind-body communication? Because it has been proven effective in reducing or eliminating IBS symptoms, thats why.
