

The Desktop Studio

Home recording using computers is one of the fastest growth segments in music. Over a half-dozen new magazines addressing this market have launched in the last five years alone, helping make the computer the dominant tool of the audio industry and the at home recordist. With the right software, your computer can be a recorder, mixer, editor, video production system, and even a musical instrument. The Desktop Studio will help you get the most out of your computer and turn it - and you - into a creative powerhouse. It is a fully illustrated, comprehensive look at software and hardware, and provides expert tips for getting the most out of your music computer.
