

Obstetrics/Gynecology: Irritable Bowel Syndrome (Audio-Digest Foundation Obstetrics/Gynecology Continuing Medical Education (CME). Book 56)

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners physicians and other healthcare professionals with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. Audio-Digest Obstetrics and Gynecology is specifically designed to provide the participant with state-of-the-art information, such as: Antepartum and intrapartum assessment Breast disease Contraception Domestic violence Dysfunctional uterine bleeding Ethical issues Female stress urinary incontinence Genetics Genital tract infections Gynecologic oncology HIV and AIDS Infertility Menopause and hormone replacement therapy Primary care topics Sexually transmitted diseases Risk management and legalities The goal of this program is to improve the management of irritable bowel syndrome (IBS). After hearing and assimilating this program, the clinician will be better able to:

- 1: Discuss the 4 theories about the etiology of IBS.
- 2: Recognize the importance of stress management, sleep, and exercise in the management of IBS.
- 3: Explain the role of diet in IBS.
- 4: Describe the association between celiac disease and IBS.
- 5: Discuss the role of fiber and probiotics in the management of IBS.
