

Learning and Teaching: Research-Based Methods, MyLabSchool Edition (4th Edition)

This substantially revised Fifth Edition represents one of the most up-to-date, research-based methods texts available today. This text has two specific goals: to change how teachers think about teaching and to change how they actually teach. Solidly grounded in research, the text describes practical methods in a clear, readable manner with numerous case examples and offers suggestions for applying those methods in today's diverse school environments. Kauchak and Eggen organize their discussion around three important themes in education: diversity, motivation, and technology.
