

Purines: Pharmacology and Physiological Roles (Satellite Symposium of the 9th Ivphar Congress)

Twenty-five papers presented at a Satellite Symposium of the 9th IUPHAR Congress focus on purine receptors and the interactions of purines with adenylate cyclase. Among the topics discussed are the structures of purine receptors in both the central nervous system and in peripheral tissue, the pharmacological effects of purines in the nervous system, the possibilities of a modulation of adenylate cyclase, and the effects of purines on cell growth and differentiation.
