

Positive Parenting in Action: The How-To Guide for Putting Positive Parenting Principles into Action in Early Childhood

Parenthood is a beautiful journey. We don't have to become adversaries with our children; doing so is very unnatural to our humanity. We are all wired for connection, for closeness, and for love. Positive parenting frees us to move from the traditional parenting roles which create friction and rebellion and allows us instead to move into a more natural role which creates cooperation and peace. The inevitable conflicts that arise in a relationship no longer define the relationship, but serve as stepping stones to greater understanding and connection. There is an abundance of resources available which tell parents why traditional parenting practices are not optimal, but few help parents learn what to do in place of traditional practices. In this book, we will discuss the principles of positive parenting, and then we will go through more than 40 scenarios to show you what it looks like when these principles are put into action.
