

Regulating Older Drivers: Are New Policies Needed? (Occasional Papers)

Are older drivers posing increasing risk to the public? If so, what public policies might mitigate that risk? Older drivers (those 65 and older) are slightly likelier than drivers aged 25 to 64 to cause an accident, but drivers aged 18 to 24 are nearly three times likelier than older drivers to do so. The authors of this paper conclude that stricter licensing policies targeting older drivers would likely not improve traffic safety substantially.
