

Minecraft Minigame How To: Book 1: Cake Attack

Cake Attack is a single-player mode Minecraft minigame made from command blocks (just like One Command Creations) that plots you against a horde of zombies, while you have to eat all the cake. You'll improve your command block programming skills and have fun at the same time! You have hunger and have 5 minutes to eat every slice of cake on the field. In the center of each cake pile is a zombie spawner. You have to fight to stay alive while trying to eat all the cake! This book is divided into three levels of difficulty: Beginner, Intermediate and Advanced. 1. BEGINNER (2 command blocks): How to make the non-automated game. If you build this first, it will help you understand the game. You'll have to keep time yourself and make yourself hungry. 2. INTERMEDIATE (add 34 command blocks): Adds automated timekeeping (24 command blocks) and kits (10 command blocks) to make it harder. 3. ADVANCED (add 34 command blocks): Adds automated mobspawner/cake setup (24 command blocks and scorekeeping (10 command blocks)).
