

Sex-Love-Erotic Jobs-Business Superbook

This is a practical book on either how to get a job in the sex industry or start a business associated with love and sex. People should have the right to pursue their own sex, love and marriage interests. There is nothing immoral about it unless you commit adultery with someones spouse or force sex on anyone including animals and children because they are not mentally mature enough to have the ability to consent. I personally think that the human race would benefit from neighborhood brothels where people go to get a dose of pleasure anytime they want for a modest amount of money. In most of the world, prostitution is legal and common. I dont like the word prostitution because its coated with a demeaning connotation as though a person is doing something evil, selling their souls so to speak but the truth is that many decent people do it either for the fast money or because theyre creative bohemian types who see it as a good way to earn a living. For some people, its interesting work because they get to meet all kinds of people and do different things. For some, its sheer desperation for money and/ or drugs but the motives dont matter. The issue is freedom. By and large, we, as English North American society, are not free and do not live happy lives sexually because most people, married and single alike, are always horny and cannot find ready lovers unless they pay for it. Society says its wrong and illegal. This is a grave injustice against us, the people. I think sex for sale in its various forms is a good thing for the economic well-being of society and the collective joy of the people. Sex sells. There is money to be made in many love and sex fields in any local area. Some areas of the sex industry are saturated. I see porn websites going dead all the time. Thats not a way to make money anymore because a few porn manufacturers and websites have captured almost all the business. Tube8 offers free porn for

download. They only make money when people buy the premium high-definition service. It's the YouTube of porn. No other porn website can compete. People only pay for porn because they don't know Tube8 or Empflix exist. Dating websites and matchmaking services are always in demand in any local area. The big few dating websites are there but dating is really local. There are some local and niche dating websites for the different types of people out there. There are turn-key dating website host businesses that make it easy to set up a dating website for free. Your job would be to get publicity for your website. That's the hard part of any website, getting people to know you exist. Selling sex through escorting is a huge business anywhere, even though it's illegal in most of North America. You can earn money hosting sex toy and lingerie parties for small groups of women in any area. Sex surrogacy is an emerging field, basically somebody who helps disabled and old people get off. People are still hiring phone sex operators. They're still getting business even in the internet porn age. Selling live webcam solo porn is common. A guy pays \$50 or more and he communicates through chat or keyboard with a naked girl on the screen for anywhere from fifteen minutes to an hour. There are conglomerate webcam porn businesses but a lot of girls are freelancers. They set it up themselves with PayPal and they're in business. They find regular customers.
