

Our Forbidden Moon

David Bryants book *Our Forbidden Moon* has taken fifteen years of meticulous planning and research to write. During meetings with over thirty astronauts and cosmonauts, including seven of the twelve alleged Moonwalkers, the author gradually became aware of a number of major inconsistencies in their recollections of the Apollo program. Furthermore, in occasional unguarded moments, several space travellers have revealed personal experiences of the UFO phenomenon and hinted at even more dramatic encounters. *Our Forbidden Moon* examines these revelations and considers whether there might be a link between UFOs, extraterrestrial races and mankind's forty-year failure to travel beyond low Earth orbit. The author uses his knowledge gained during forty years as a teacher, lecturer and respected authority on spaceflight and meteoritics to ask controversial questions and provide convincing solutions.
