

The Sooterkin

The Sooterkin is a vividly imagined and wickedly funny tale of an upside-down world turned inside out. On a squally afternoon in the winter of 1821 Sarah Dyer gives birth to the strangest child ever seen in Van Diemens Land, a thing more seal than human. The Reverend Mr Kidney at first suspects a virgin birth. Mr Sculley, an anatomist and man of science, hails it as the antipodean answer to the elusive Dutch sooterkin. The pup is a joy to its parents and a welcome companion to the their nine-year-old son, Ned. But when a well-dressed stranger arrives bearing a modest proposal for the infants future, no-one foresees the trouble that lies ahead. As fantastical as anything in the writings of Garcia Marquez, an elating experience, its a rare delight to see such an accomplished novelist emerge fully formed. Bulletin
