

## The Thyroid Cancer Book : Second Edition

M. Sara Rosenthal, Ph.D., bestselling author of *The Thyroid Sourcebook* (recommended by *The New York Times*), *The Thyroid Sourcebook for Women* and *The Hypothyroid Sourcebook* has just published *The Thyroid Cancer Book*, the only consumer book to date devoted to thyroid cancer. A thyroid cancer survivor herself, Rosenthal wrote the book she wishes she had when diagnosed in 1983. *The Thyroid Cancer Book* explains all forms of thyroid cancer and its treatment in plain language. It was written in consultation with the leading medical experts on thyroid cancer in North America, and is the only book of its kind in the world. It includes extensive information on: Significant risk factors for developing the disease, and how to find and investigate lumps in the neck Papillary and follicular thyroid cancers, as well as the less common medullary and anaplastic cancers Treatment options, surgery and radioactive iodine Post-treatment follow up, whole body scans and Thyrogen Self-healing and complementary therapies The emotional impact of cancer on families and loved ones Palliative care While thyroid cancer accounts for roughly two percent of all cancers, its among the fastest growing cancers in incidence. Its causes in North America are associated with fallout from nuclear testing in the American midwest, and environmental causes which Rosenthal also writes about in detail. Recommended by Johns Hopkins Thyroid Tumor Center, The Thyroid Foundation of America, The American Foundation for Thyroid Patients, The Thyroid Foundation of Canada, CancerHelpUK, and thyroid cancer patients from both Thyca and ThyVors. What thyroid cancer survivors are saying about *The Thyroid Cancer Book*: Once again, Rosenthal has written a thoughtful, comprehensive, well researched, highly readable book, which will greatly benefit both newly diagnosed

patients and veteran thyroid cancer survivors. Hal Crane, attorney and member of ThyCa (Morganville, New Jersey). An excellent, easy-to-read introduction to the complexities of thyroid cancer for the layperson, addressing not only the medical issues, but the emotional and social impact of the disease on patients, their friends and families. Dianne Dodd, author and member of ThryVors (Ottawa, Ontario). If I could, I would put this book in the hands of every thyroid cancer patient! Rosenthal provides the information patients need to make decisions about their care, and the reassurance that they are not alone. Megan Stendebach, writer of a collection of lighthearted thyroid cancer songs and member of ThyCa (San Antonio, Texas, www.thyroidcancersongs.com).
