

Hazard Ahead

In this original and practical manual, driving instructor Andy Hall guides new - and more experienced - car drivers through every type of hazard they are likely to meet on Britains roads. Using unique through the windscreen photographs linked to explanatory text, every kind of driving situation, on country roads through built-up areas to motorways, is expertly covered. This book will also complement your Hazard Perception Training. A final comprehensive set of questions tests your knowledge, ensuring that whatever driving hazard appears on the road ahead, you'll know how to deal with it.
