

Verbal Fractions (Verbal Math Lesson Book 4)

Fractions are the first major stumbling block children experience in school. If they do not master Fractions, they are liable to develop a permanent dislike for math. With this book, you can help your child become a whiz at Fractions, learning step by step without any writing, all problems to be done in the head. No pencil or paper required. This eBook contains problems and answers, and is designed for the parent or the teacher. It is not to be handed to the student. The problems should be read to the child. A student copy without answers is also available.
