

THE GARDEN TRIUMPHANT Victorian Garden Taste

Whether you want to grow Victorian flowers, have a period garden, or are just interested in gardens of the past, this is the book for you. In the Victorian era, almost everyone gardened, and for the first time most gardeners gardened in the same way, whether wealthy tycoons in their vast houses, or the humblest citizens growing roses and potatoes side by side in their tiny lots. Gardening in Victorian America and England created thousands of new businesses, the manufacturing of new lawnmowers, cast iron urns, ceramic edgings, the new rubber hoses, and more. It discovered huge new markets: women in their parlours waiting for something to do took on gardening as a hobby; gardeners anxious for something new to read or to plant embraced each new fad. The influence of Victorian gardening was immensely powerful, and is still with us. Wherever a garden has alternate blue lobelia and white alyssum along its paths, or is awash with old roses and pinks, even if it has only island beds, gnomes, or terracotta pots with lemons, it is still late Victorian. *The Garden Triumphant* gives a unique picture of how the gardening public lived and thought during the period that created whole nations of gardeners.
