

## The Heart Remembers

Romance Large Print Edition Miss Baldwin ... (tells) an interesting story with humor and intelligence. The New York Times Carol Reid lost her advertising job when the magazine she worked on folded, but she was lucky enough to be hired as head of a publisher's publicity department. She wasn't concerned when she heard the name of the vacationing editor-in-chief Andrew Morgan was a common name, surely it wasn't her Andy. But it was; Andy who she had stopped loving eight and a half years ago when she had resumed her maiden name. Now some unexplained urgency compelled Carol to examine her true feelings for him before they both married someone else.
