

The Kidney Sellers: A Journey of Discovery in Iran

Rarely does an adventure story carry such social significance as in this groundbreaking ethnographic research book. Dr. Fry-Revere's exploration of the medical ethics of compensating organ donors takes us deep inside Iranian culture to provide insight and understanding into how Iran has solved its kidney shortage. *The Kidney Sellers: A Journey of Discovery in Iran* addresses the question: How is it possible that in Iran there is a waiting list to be a donor, while in the United States hundreds of thousands of people have died for lack of a kidney? Dr. Fry-Revere is the first Westerner ever to witness firsthand Iran's organ procurement system. She shares what she discovered in this fascinating book: part diary of living in a dangerous country, part ethnographic essay, and part tale of people working together to overcome death and financial ruin. *The Kidney Sellers* is a shocking, thought-provoking true story.
